

flowlines to provide accurate measurement of the overall heat transfer coefficients (OHTC) and cooldown behaviors of these systems; and "Effects of Water Cut on Wax Deposition in Deepwater Flowlines"—to determine the effects of water cut on wax deposition in oil flowlines and to investigate wax deposition characteristics in typical oil-water flow patterns using the 4-in, 500-ft long deepwater flow assurance loop at the Texaco Humble Test Facility.

No other changes have been made in either the membership or planned activity of the group research project. Membership in this group research project remains open, and Petroleum E&P Research Cooperative intends to file additional written notification disclosing all changes in membership.

On January 16, 1997, Petroleum E&P Research Cooperative filed its original notification pursuant to Section 6(a) of the Act. The Department of Justice published a notice in the **Federal Register** pursuant to Section 6(b) of the Act on February 13, 1997 (62 FR 6801).

The last notification was filed with the Department on July 14, 1998. A notice was published in the **Federal Register** pursuant to Section 6(b) of the Act on September 29, 1998 (63 FR 51955).

Notice Pursuant to the National Cooperative Research and Production Act of 1993—Southwest Research Institute: Heavy-Duty Diesel Engine Emission Testing to Generate NO_x and PM Correction Factors

Notice is hereby given that, on March 26, 1999, pursuant to Section 6(a) of the National Cooperative Research and Production Act of 1993, 15 U.S.C. 4301 *et seq.* ("the Act"), Southwest Research Institute: Heavy-Duty Diesel Engine Emission Testing to Generate NO_x and PM Correction Factors has filed written notifications simultaneously with the Attorney General and the Federal Trade Commission disclosing (1) the identities of the parties and (2) the nature and objectives of the venture. The notifications were filed for the purpose of invoking the Act's provisions limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances. Pursuant to Section 6(b)

of the Act, the identifies of the parties are Caterpillar Inc., Peoria, IL; Cummins Engine Co., Columbus, IN; Detroit Diesel Corporation, Detroit, MI; Mack Trucks, Inc., Hagerstown, MD; and Volvo Truck Corporation, Gothenburg, Sweden. The nature and objectives of the venture are to develop engine intake air temperature correction factors for NO_x and PM, and humidity correction factors for NO_x, for several on-highway, heavy-duty diesel engines.

Notice Pursuant to the National Cooperative Research and Production Act of 1993—Southwest Research Institute ("SWRI"): Advanced Reciprocal Engine Systems ("ARES")

Notice is hereby given that, on February 9, 1999, pursuant to Section 6(a) of the National Cooperative Research and Production Act of 1993, 15 U.S.C. § 301 *et seq.* ("the Act"), Southwest Research Institute ("SWRI"): Advanced Reciprocal Engine Systems ("ARES") has filed written notifications simultaneously with the Attorney General and the Federal Trade Commission disclosing (1) the identities of the parties and (2) the nature and objectives of the venture. The notifications were filed for the purpose of invoking the Act's provisions limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances. Pursuant to Section 6(b) of the Act, the identities of the parties are Altronic, Inc., Girard, OH; Caterpillar Inc., Lafayette, IN; Cooper Cameron Corporation, Springfield, OH; Gas Research Institute, Chicago, IL; Southern California Gas Company, Los Angeles, CA; Waukesha Engine Division, Dresser Industries, Inc., Waukesha, WI; and Woodward Governor Company, Industrial Controls Group, Fort Collins, CO. The nature and objectives of the venture are to develop and demonstrate reciprocating engine technology that will enable natural gas engines in power generation application to achieve 50 percent energy conversion efficiency and NO_x emissions of 5 ppm (corrected to 15 percent oxygen) through the identification and understanding of potential techniques and phenomena such as the combustion and knock processes, the use of an expanded cycle (Miller), ignition system development,

new materials for exhaust energy retention, improved turbocharging and turbocharger control and exhaust aftertreatment.

Notice Pursuant to the National Cooperative Research and Production Act of 1993—Southwest Research Institute: Fuel Filtration Cooperative R&D Program—Phase III

Notice is hereby given that, on March 1, 1999, pursuant to Section 6(a) of the National Cooperative Research and Production Act of 1993, 15 U.S.C. 4310 *et seq.* ("the Act"), Southwest Research Institute: Fuel Filtration Cooperative R&D Program—Phase III has filed written notifications simultaneously with the Attorney General and the Federal Trade Commission disclosing (1) the identities of the parties and (2) the nature and objectives of the venture. The notifications were filed for the purpose of invoking the Act's provisions limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances. Pursuant to Section 6(b) of the Act, the identities of the parties are Caterpillar, Inc., Mossville, IL; Champion Laboratories, Inc., West Salem, IL; Donaldson Company, Inc., Minneapolis, MN; and Fleetguard, Inc., Cookeville, TN. The nature and objectives of the Venture are to verify that wear index test rating and actual engine wear rates correlate, improve the current test method to incorporate additional vibration, and to measure and document the filter head accelerations.
